Allard, H. A.

Book 18.

Synopsis of collection numbers by localities.
Nos. 1 - 11800. 1930-1945.

SMITHSONIAN INSTITUTION
UNITED STATES NATIONAL MUSEUM
WASHINGTON, D. C.

January 30, 1937.

Dr. H. A. Allard,
U. S. Department of Agriculture,
Bureau of Plant Industry,
Washington, D. C.

Dear Dr. Allard:

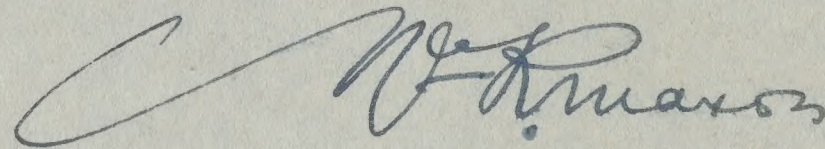

Mr. Leonard has finished identifying your big collection from the Bull Run Mountains, has laid out a set for the National Herbarium, and has made up the duplicates into six additional sets. The duplicate sets will be sent to the Gray Herbarium, the New York Botanical Garden, Field Museum of Natural History, Missouri Botanical Garden, Carnegie Museum (Pittsburgh), and to some one of the Virginia institutions. When you happen to be in again we can decide just where the set last mentioned is to go.

I am returning your field notebook herewith and am enclosing also a complete list of identifications which at my suggestion Mr. Leonard has made up for your use. That seemed a better plan than to write in corrected or new identifications in your field book.

Mr. Leonard has a lot of identification and other work on hand, so I think it would probably be a good idea to wait a few weeks before sending over the additional Bull Run material that you have.

With kind regards,

Yours very truly,

William R. Maxon
Associate Curator
Division of Plants.

Enclosures
141598

Notes for Dr. Allard for furtur collecting in Bull Run region

Juncus.

We have enough *J. tenuis* ! But watch for other species. If one has the general appearance of *J. tenuis* and the ligules are thin , white and 1 mm. long or more it will be *tenuis* but if the ligules have no appreciable length whether white or yellow, thick or thin, get them. It would be well to get some more material of the species with the flowers crowded in heads both of the flat leaved and the hollow septate groups .

Apocynum.

Get more of this interesting group. You have collected several sheets of what seem to be *A. medium*, poorly represented in the U.S.N. Herb.

Juncoides

Look for the var *bulbosus* with the bracts or sepals shorter than or equaling the capsule.

Legumes

Find more *Lespedeza stipulaceae* Maxim.

There are no collections of this plants from U.S. in the herb, except your 2180 from woods ~~near~~ n. of Beverley.

Mints.

Get more specimens of *Lycopus* being careful to get as much of the root system as possible.

Get more *Monarda* and *Koellia*.

Oxalis

Get more yellow flowered *Oxalis*, selecting plants where possible, with both fruit and flowers.

Malvaceae

There should be a number of weeds of this family of weeds in The Bull Run region. So far there is only *Malva rotundifolia* in your collection.

Orchids

we have enough Cypripedium acaule.

Get more Corallorhizas

Peramiums

Ibidiums

- 1-4 Arlington Co., Pinnit Run Oct. 12 to Oct. 29, 1930
